Alert counts by risk and confidence

This table shows the number of alerts for each level of risk and confidence included in the report.

(The percentages in brackets represent the count as a percentage of the total number of alerts

included in the report, rounded to one decimal place.)

Tota	Baixo	Médio	Alto	User Confirmed

Alert counts by site and risk

This table shows, for each site for which one or more alerts were raised, the number of alerts raised at each risk level.

Alerts with a confidence level of "False Positive" have been excluded from these counts. (The numbers in brackets are the number of alerts raised for the site at or above that risk level.)

Alert counts by alert type

This table shows the number of alerts of each alert type, together with the alert type's risk level. (The percentages in brackets represent each count as a percentage, rounded to one decimal place, of

the total number of alerts included in this report.)
